#### Hints for Better Crowing

A rooster cannot be made to crow, however, he can be encouraged! Caging him several days before the contest and moving him in strange surroundings is a good training program. Flighty or hard to manage birds seldom crow. Keep the cage covered or dark and remove the covering just before the contest begins. He is then fooled into believing morning has just arrived. Contestants may use any method, without touching the bird, to get their entry to crow.
